PROJECTS

StepSafe | Swift, ARKit, YOLO11s, TypeScript, Fastify, MongoDB, Next.js, Gemini Miami, FL
ShellHacks 2026 · Built with Claude Code, Cursor, and Grok Bot Sep 2026

- Conceived and co-built in 36 hours: a head-mounted iPhone app that uses LiDAR depth and on-device object detection to warn blind and low-vision pedestrians about obstacles, drop-offs, and fast-approaching objects.
- Designed the iOS app and the web community map, and orchestrated AI agents to review every pull request and iterate until each change met our bar.
- Shipped live at stepsafe.miami: a community hazard map backed by an API that merges nearby reports and labels hazards with an LLM.

samehere.dev | Next.js, TypeScript, React, PostgreSQL, Supabase, Stripe, Tailwind CSS, Vercel Remote
Built with Claude Code and Cursor Jun 2026 – Present

- Solo-built and launched a student networking platform (live on Vercel) with auth, a stage-labeled feed, public portfolios, realtime DMs, search, and block/report safety.
- Directed AI agents to build the Supabase backend (Auth, Postgres, Realtime, Storage) with Row Level Security and versioned migrations; reviewed every diff and tested each flow before merging.
- Integrated Stripe Checkout with signature-verified webhooks for a Pro tier.

Sona | React, Express, Node.js, PostgreSQL Remote
Full-Stack Developer, CodePath WEB103 team Jul 2026 – Aug 2026

- Shipped a full-stack artist hub for profiles, follows, concerts, and merch with a 6-person team, using GitHub Issues and pull requests.
- Built the artist API (list with search and genre filters, detail, update, delete) and the React directory and artist pages.
- Built follow/unfollow end to end: a Postgres join table keyed on user and artist, an upsert endpoint, and a React button that updates in place.

SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS
- **Frameworks:** React, Next.js, Express, Tailwind CSS
- **AI Development:** Claude Code, Cursor, Grok Bot, LLM APIs
- **Tools:** Git, GitHub, PostgreSQL, Supabase, Vercel

EDUCATION

Western Governors University Expected Fall 2027
B.S. Software Engineering (competency-based, self-paced)

- Coursework: Data Structures and Algorithms I, Front-End Web Development, Discrete Mathematics I, Calculus I, Technical Communication, Version Control, Introduction to Systems Thinking.

CodePath Jun 2026 – Aug 2026
Software Engineering Program Honors: WEB103, AI110

- WEB103 Intermediate Web Development (Honors): full-stack apps with React, REST APIs, PostgreSQL, and cloud deployment; code review and pull-request workflows.
- AI110 Intro to AI and LLMs (Honors): prompt engineering and LLM API integration in apps, with attention to AI ethics and evaluation.
- TIP101 Technical Interview Prep: data structures and algorithms, timed problem solving, and technical communication.

EXPERIENCE

Chipotle Mexican Grill Gainesville, FL
Service Leader Jul 2021 – Sep 2026

- Led closing shifts as manager on duty while covering the work of 3 to 4 positions on lean staffing; trusted to run high-volume stations solo for speed and accuracy.
- Owned morning openings: received and rotated 100+ cases per delivery (\$10K to \$15K of inventory) in under an hour, reconciled cash, managed catering orders, and led prep before service.
- Trained crew on written food-safety and service standards so quality stayed consistent under pressure.
