

DEVGIRI “DEV” GOSWAMI

Gainesville, FL | (352) 278-8220 | contact@builtbydev3v.com | linkedin.com/in/builtbydev | github.com/builtbydev3v

Software Engineer Intern

PROJECTS

samehere.dev | Next.js, TypeScript, React, PostgreSQL, Supabase, Stripe, Tailwind CSS, Vercel Remote
Built in Claude Code and Cursor Jun 2026 – Present

- Built the live student networking app in Claude Code and Cursor: I write the spec, the tools generate the implementation, then I review the diff, test the flow, and fix what I would not ship.
- Shipped invite-only beta with auth, profiles, feed, realtime DMs, clubs, notifications, and an AI jobs board; continuous deploys via Vercel git deploys.
- Designed the PostgreSQL/Supabase schema with versioned migrations, Row Level Security, and an RLS regression suite; used the Claude API for matching, search, and ranking plus Stripe Checkout and signature-verified webhooks.

Sona | React, Express, Node.js, PostgreSQL Remote
Full-Stack Developer, CodePath team Jun 2026 – Jul 2026

- Collaborated with a 6-person team to ship a full-stack artist hub for profiles, follows, concerts, and merch.
- Built artist directory/CRUD and follow/unfollow flows across a React frontend and an Express/PostgreSQL API using GitHub Issues and pull requests.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Frameworks:** React, Next.js, Tailwind CSS
- **Tools:** Git, PostgreSQL, Supabase, Vercel, Claude Code, Cursor

EDUCATION

Western Governors University Expected Fall 2027
B.S. Software Engineering GPA: 4.0

- Coursework: Data Structures & Algorithms, Discrete Mathematics, Version Control, Systems Thinking, Technical Communication.

CodePath Jun 2026 – Present
Software Engineering Program Honors: WEB103, AI110

- Completed WEB103, AI110, and TIP101. Built full-stack apps with React, Node.js, Express, PostgreSQL, and REST APIs. Continuing TIP102 and AI201 in Fall 2026.

EXPERIENCE

Chipotle Mexican Grill Gainesville, FL
Service Leader, Part Time Jul 2021 – Present

- Lead high-volume shifts in a customer-facing environment; train crew on written food-safety and service standards so quality stays consistent under pressure.
- Tightened station procedures and cut waste 15% while lifting throughput 20% through clearer checklists and faster problem resolution on the line.
