DEVGIRI “DEV” GOSWAMI

Gainesville, FL | (352) 278-8220 | contact@builtbyd3v.com | linkedin.com/in/builtbydev | github.com/builtbyd3v

EDUCATION

Western Governors University Expected Fall 2027
B.S. Software Engineering (competency-based, self-paced)

- Coursework: Data Structures and Algorithms, Front-End Web Development, Discrete Math, Calculus I, Version Control.

CodePath Jun 2026 – Aug 2026
Software Engineering Program Honors: WEB103, AI110

- WEB103 Advanced Web Development (Honors): full-stack React, REST APIs, PostgreSQL, deployment, PR review.
- AI110 Foundations of AI Engineering (Honors): prompt engineering and LLM API integration, with AI ethics and evaluation.
- TIP101 Technical Interview Prep: data structures and algorithms, timed problem solving, technical communication.

PROJECTS

Albie | Python, FastAPI, Claude Agent SDK, Grok Realtime API, WebRTC, Unity Oct 2026
1st Place Overall + MLH Best Open Source *· Gator Hack V · Team of 5 · Claude Code, Codex* github.com/builtbyd3v/Albie

- Designed the voice architecture of a Meta Quest 3 AI coding assistant: a FastAPI hub streams mic audio to Grok’s realtime speech API and hands code work to Claude Agent SDK agents. Authored 53 of 85 merged PRs.
- Raised natural-speech accuracy from 10% to about 90% with zero missed turns by building a simulated headset and a Claude-judged eval harness (2,339 scored turns on 3 parallel hubs), then fixing barge-in and turn-taking.
- Built a 60-tool registry served to Grok as function calls and to Claude as an in-process MCP server, plus a proactive watcher that speaks up on code errors, crashes, and overfitting.
- Streamed VS Code to the headset over WebRTC; built the VS Code extension the agent drives (calls 0.3–1.1 s to <0.1 s).

checkwith.us | Swift, SwiftUI, Core ML, PyTorch, Next.js, PostgreSQL Oct 2026
SwampHacks XII · Team lead, team of 4 · Built with Claude Code and Codex checkwith.us

- Led a 4-person team building an iPhone app that protects older adults from scams: it filters scam texts on device, labels scam calls, and holds risky payments (gift cards, crypto, new payees) until family approves with Face ID.
- Trained an on-device scam-text classifier; when a 67 MB DistilBERT crashed iOS’s Message Filter, shipped a 1 MB n-gram model that catches 96% of scams at a 2.4% false-alarm rate on 884 real texts, with leak-free splits.
- Shipped the iPhone apps and Message Filter and Call Directory extensions; designed the Auth0/Postgres backend.

StepSafe | Swift, ARKit, YOLO11s, TypeScript, Next.js, MongoDB Sep 2026
ShellHacks 2026 · Built with Claude Code, Cursor, and Grok Bot github.com/xvedara/shellhacks-2026

- Conceived and co-built in 36 hours a head-mounted iPhone app that uses LiDAR depth and on-device object detection to warn blind and low-vision pedestrians about obstacles, drop-offs, and fast-approaching objects.
- Designed the iOS app; shipped a live hazard map whose API merges nearby reports and labels them with an LLM.

samehere.dev | Next.js, React, TypeScript, Supabase, Tailwind CSS, Apple Wallet Jun 2026 – Present
Solo project · Built with Claude Code · Launching Nov 2026 samehere.dev

- Solo-building a profile site where CS students find hackathon teammates; every stat is counted from real data (Devpost-verified prizes, shipped projects, GitHub contributions), never typed in.
- Each profile renders a FIFA-style card as a Discord/X link preview, an image, and an Apple Wallet pass with a QR code; cut the card’s uncached render on Vercel from 4.5 s to about 1 s by drawing its heatmap as one SVG.

OPEN SOURCE

nodeterm | TypeScript, Electron, whisper.cpp · node-based terminal manager for AI coding agents Oct 2026
5 merged PRs (#1128, #1279, #1284, #1285, #1286) · Built with Claude Code github.com/eneskirca/nodeterm

- Cut macOS dictation time 9x (5.97 s to 0.64 s) by tracing a silent CPU fallback to Metal shaders hidden in app.asar.
- Fixed a speech-engine crash (4 of 4 runs) from uninitialized whisper.cpp params by patching the native binding.
- Raised Liquid Glass text contrast from about 1:1 to at least 3:1 at every transparency level, with no frame-time cost.
- Added Cursor’s agent CLI as a built-in agent with live status, usage meters, chat, resume, and permission modes.

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Swift, SQL, HTML, CSS
- **Frameworks:** React, Next.js, SwiftUI, FastAPI, Tailwind CSS
- **AI Development:** Claude Code, Codex, Cursor, Claude Agent SDK, MCP, LLM APIs
- **Tools:** Git, GitHub, PostgreSQL, Supabase, Vercel

EXPERIENCE

Chipotle Mexican Grill Gainesville, FL
Service Leader Jul 2021 – Sep 2026

- Led shifts as manager on duty, covering 3–4 roles on lean staff; received $10K–$15K deliveries in under an hour.
